## **DETAILED ACTION**

Claim 14-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Clerc et al discloses (figure 4 claim 1) including a liquid crystal cell comprising a pair of substrates 19-20 and a liquid crystal layer 18 arranged between the pair of substrates, first and second polarizers 21-22 arranged on either side of the liquid crystal cell; a first retardation plate 24 arranged between the liquid crystal cell and the first polarizer and a second retardation plate arranged between the liquid crystal cell and the second polarizer 23; each of the first and second retardation plates having an optical axis in a plane parallel to the surfaces of the substrates and a retardation of substantially ¼ (see column 6, lines 44-55 which indicate a retardation of 150nm, which is in the range applicant lists as corresponding to substantially ¼ wave. The optical axis of the first retardation plate being perpendicular to the optical axis of the second retardation plate (see cover figure), the first and second polarizers having polarizing axes arranged at an angle of 45 with respect to the optical axes of the first and second retardation plates (also see figure).

Clerc does not disclose five plates as claimed the retarder and particularly including the pair that each has zero negative birefringence.

The prior art does not disclose or fairly suggest the claimed invietion. Therefor the present invention is considered to be patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/079,008

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Lucy P. Chien whose telephone number is 571-272-

8579. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Robert Kim can be reached on (571)272-2293. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
